WALL MOUNT INSTALLATION INSTRUCTIONS

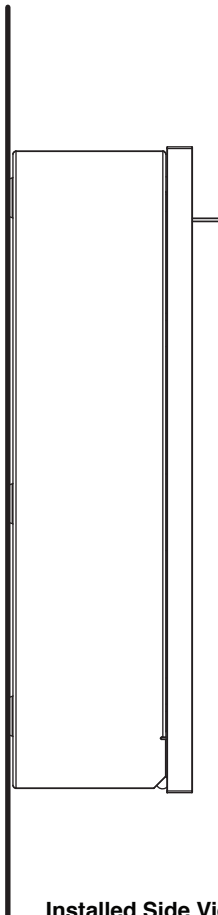

1. MOUNTING THE LETTER BOX

- Place the letterbox in the desired mounting location, open the front and find the 4 mounting holes on the back wall of the outer box (marked A, B, C, D).
- For best results we suggest using a spirit level to mount the letterbox straight.
- Mark the 4 mounting holes with a permanent marker or pencil.
- Remove the letterbox and pre-drill the screw holes.

Note: Different substrates will require appropriate fasteners, ensure the correct fasteners are used with adequate weight rating.

- Once the holes are drilled put the letterbox up and screw through the holes into the wall. Tighten up all 4 screws.
